

County

Location: boundaries\county

Description

This layer consists of the Bay County boundary, including detailed shoreline. The layer consists of 6 polygons, as well as arc features and annotation of community and beach names.

For a simplified version with 1 polygon, see **countygeneral**.

For a saltwater version with 14 polygons, see **countygulf**.

For an older version with a different shoreline, see emergencyplanning\pbsj\bay_bndy cov.

For community and place points only, see **place_names.shp**.

Source

This cover was created June 1998 by Bay County GIS staff using features from the water and PLSS coverages. Features from the **water** cover were used for the south and NW boundary lines (shoreline and pine log creek). Section lines from the **plss** cover were used for the east, west, and north boundary lines. Aerial Cartographics of America created the **water** cover from aerial photography and the **plss** cover is from the Florida Department of Environmental Protection and is based on 1:24000 scale USGS quadrangle maps. For more information, see **water.doc** and **plss.doc**.

In October 2000, Bay County GIS staff added the arc attribute **type**, similar to the **plss** layer (see **plss.doc**).

This layer is for graphic display purposes only.
